DESCRIPTION

AMNESIA, launched by ROYAL DENSHIP, designed by BILL DIXON and engineered by High Modulus, has an outstanding amount of internal space and elegant exterior profile. The very first vessel in the semi-custom New Range AMNESIA - ROYAL DENSHIP 85, represents the very best in Scandinavian design, construction style, quality and finish for a modern flybridge motor yacht. A wonderful synthesis of performance, luxury and comfort. The salon is especially remarkable and is the largest in any semi-custom yacht of her size. The yacht is equipped throughout with the top end Lantic integrated navigation, entertainment, room environment, engine and CCTV control system, allowing remote access to these elements in different parts of the yacht. The four cabins for owner and guests, with particularly sumptuous owner's and VIP guest cabins, are tastefully furnished with clean and uncluttered design, finished to superb standards by the best of Danish craftsmen. AMNESIA's Flybridge exudes an air of quality and refinement. It is enormous and incorporates a hot tub. The clean, minimalistic design of the helm station is practical and leaves the rest of the flybridge as an uncluttered space for sampling the contents of the bar area or just lounging and enjoying the view. Another excellent place to relax when the yacht is at rest is the aft platform, which can be hydraulically lowered and used for bathing, relaxing, or as a simple way for launching and easy access to the tender and other water toys.
