## DESCRIPTION

Orient Star has the most exquisitely designed interior by award winning Tara Bernerd, and the 47m motor yacht is truly in a class of her own. Orient Star benefits from Bernerd's experience in residential design, and this brings a fresh approach to this tri-deck yacht, illustrated through the use of rich materials, carefully selected artwork and accessories and a monochromatic palette of greys and whites. Orient Star was built by Turkish shipyard, CMB Yachts and was delivered in 2012. Her interior has been custom designed specifically for friends, families and parties. Space planning for entertaining, namely the two salons, was of paramount importance. The main salon consists of a sociable seating area with an adjacent bar, all finished with warm woods and neutral hues. Forward of the main salon, Orient Star has a modern yet simplistic dining room that seats 10 guests, and concealed behind that is a large fully functioning galley allowing for quick and efficient service. Offering luxury accommodation for 10 guests, Orient Star's main deck is home to the full beam master suite forward. Boasting stunning views thanks to the floor-to-ceiling windows, the owner's quarters comprise a study area, walk in wardrobe and a spacious en suite. Orient Star's remaining four en suite staterooms come in the form of two doubles and two twins, and are located around the central lobby on the lower deck. Orient Star's second salon, located on the upper deck, is an exceptional space and a fine example of perfection when it comes to the blending of natural light with a chic interior. Floor-to-ceiling sliding windows on either side of the room open up to reveal intimate yet spacious balconies. Not only do they offer panoramic views, they create a space ideal for entertaining, both during the day and in the evening. Moving outside and to the full beam aft deck, sumptuous seating lines the curves of the superstructure. With optional sunshades and a large dining table, guests can enjoy an al fresco lunch or supper in the sun or shade. With an outdoor bar, a sociable seating area, and an inviting Jacuzzi surrounded by comfortable sunpads, Orient Star's large sundeck is the ultimate hub for entertaining, relaxing and lounging. Orient star also offers guests endless entertainment and fun with an abundance of water toys including jet skis, a paddleboard and scuba diving gear. She also boasts a gym complete with the latest equipment for exercise enthusiasts. Propelled by her twin 1450hp MTU engines, Orient Star reaches top speeds of 16 knots, with an economical cruising speed of 10 knots and a range of 3,000 nautical miles. Her at-anchor stabilizers reduce roll motion when berthed, offering guests absolute comfort.
